March 17, 2020

Dear Valued Customers,

During this pandemic, Cyber Knight Computers will remain open and able to serve your tech needs. With more people working and studying from home, the need to have your technology working and maintained properly is imperative.

We will continue to serve our customers with excellent service in a responsible way to keep everyone as safe from harm as possible. The store will be open for business by appointment only so that we can help customers in the store one at a time. **To make an appointment, please call 732 227 0922.** The store will be manned from 10 am – 6 pm M-F and we should be able to accommodate your needs. Whether you need a new laptop or desktop computer, repair, or upgrade, we will keep your tech operational during these difficult times. We now offer remote support for those of you who cannot bring their computers in to the store.

The surfaces in the store get cleaned with disinfectant after each customer leaves and every computer gets cleaned with disinfectant as well.

We wish all of you safety and good health throughout these trying times.

Sincerely,

Mike Beberman
President
Cyber Knight Computers Inc.
